

The new Multi-Surface Sanitiser, OCCIDERE, has been formulated and developed by RealSphere Eco World Ltd, with our in-house development expert leading the way.

This evolutionary sanitiser demonstrates proven efficacy at **30 SECONDS** against **SARS2 COVID-19** and all other known enveloped viruses and bacteria; **OCCIDERE** is UK laboratory tested and certified to BS/EN 14476:2013 + A2:2019 including Annex A* + BS/EN 1276:2019.

OCCIDERE FACTS

- Fully tested against VACCINIA VIRUS VR-1549 ELSTREE STRAIN/VERO CELLS (some current market products show testing against the weaker Feline coronavirus strains 'Strain Munich').
- **100% effective at 30 SECONDS** on all surfaces, laboratory proven, making it 10 x faster than most other products currently on the market.
- Tested under HIGH SOIL (dirty) conditions; as opposed to some current products which have been tested under LOW SOIL (clean) conditions. **OCCIDERE** therefore achieves medical grade classification for sanitising.
- Both Anti-Viral and Anti-Bacterial in nature.
- Can be used as a liquid or as an aerosol for 'fogging' to help fight the spread of **Covid-19**, perfect for mass transport systems, airports, aviation, hotels, hospitals, clinics, households, hosting sporting & entertainment events and much more...
- Transported as a 'non-hazardous' product and can be shipped in ready to use 5 litres containers up to 1000 IBC.
- Further enhancing its 'green credentials', **OCCIDERE** is available in refillable aluminium spray bottles (50ml-500ml) with atomiser and trigger spray nozzles.
- Developed and manufactured in the UK, tested and certified to UK and EU standards.

rsecoworldTM are the manufacturer, distributor and retailer behind cleaning and sanitising products that are already widely in use in the SuperYacht Industry and the luxury real estate sectors. The developer, himself a **rsecoworldTM** stakeholder, joined forces with us after reviewing our approach to cleaning and sanitising standards.

rsecoworldTM are working in tandem with a recognised and certified treatment company, (VortechSystems & www.surefog.com), sanitising vessels along the French Riviera & Mediterranean coast. Having tested other sanitising products they have found **OCCIDERE** to be cost effective and have the peace of mind that this is a fully certified product, clients using **OCCIDERE** now have total confidence in the resultant levels of sanitation.

The user needs very minimal **PPE** and there is zero residue left on soft or hard surfaces, mitigating the need for any clear up. It is driven by 'fogging' into every corner, unlike the static machines we currently see in use. **OCCIDERE** is becoming the product to use for those serious about sanitising their environments and not least establishing a base line of sanitation.

"We truly believe this product has its place in a future we all have to adapt to."

AN EVOLUTIONARY ECO-FRIENDLY CLEANING SOLUTION FOR ALL MEDICAL, CLINICAL AND RESIDENTIAL CARE SECTORS

OCCIDERE
PROTECTION STARTS WITH PREVENTION

OCCIDERE
PROTECTION STARTS WITH PREVENTION

FOR SURFACE USE

Spray liberally over entire area to be cleaned and leave for 30 seconds before wiping clean.

HEAVY SOILING

Remove any gross soiling, spray evenly and leave for 30 seconds before wiping clean.

WARNING

Do not ingest. In case of contact with eyes wash with plenty of water. If ingested or if irritation occurs seek medical attention.

CONTAINS ACTIVE SUBSTANCE:

Quaternary ammonium compounds, benzyl (c12-16) alkyl dimethyl, chlorides 0.22% w/w, Didecylmethylammonium-chloride 0.05% w/w, < 5% cationic surfactants, < 5% disinfectants.

READY TO USE NON-ALCOHOL BASED MULTI-SURFACE SANITISER

TESTED AND CERTIFIED TO BS/EN 1276. WORKS WITH 30 SECOND CONTACT TIME

TESTED & CERTIFIED TO BS/EN 14476 AGAINST COVID-19 + A2

EFFECTIVE AGAINST:

BS/EN 14476 2013 + A2 2019 ANNEX A* (INFORMATIVE - ENVELOPED VIRUSES).

- POXVIRIDAE
- HERPESVIRIDAE
- FILOVIRIDAE (E.G. EBOLA/MARBURG)
- FLAVIVIRUS
- HEPATITIS C VIRUS (HCV)
- HEPATITIS DELTA VIRUS (HDV)
- INFLUENZA VIRUS
- PARAMYXOVIRIDAE
- RUBELLA VIRUS
- MEASLES VIRUS
- RABIES VIRUS
- CORONAVIRUS (E.G. SARS/MERS)
- HUMAN IMMUNO-DEFICIENCY VIRUS (HIV)
- HUMAN T CELL LEUKEMIA VIRUS (HTLV)
- HEPATITIS B VIRUS (HBV)
